**Acute Cardiac Care Working Group of the Romanian Society of Cardiology**  
Aims and Activities 2011-2014

1. Web – community on Acute Cardiac Care.
2. Recommendations for the structure, organization and operation of the **Romanian Advanced Cardiac Critical Care Units**, (adopted as a rule by the Romanian Health Ministry in December 2012)
3. **RO-STEMI registry** (opened in 1997): coordination, support, management Publishing the RO-STEMI data in International Journals.
4. Monitoring the **National network of the STEMI** interventional therapy.
5. **RO – TEP registry** (Pulmonary thromboembolism).  
Including specific data in the Right Heart Thrombi European Registry (RH-TER).  
Publication the RO-TEP registry report for the 2011-2014 interval.
6. "Practical Acute Cardiac Care Handbook"
7. Specific **ACC** training activities...
8. **National Program on Cardiopulmonary Resuscitation**
9. Subspecialty of **cardiologist-intensivist** in Romania.

Date: 01 Feb 2013

**Romanian Ministry of Health issued Order no. 1322/21.12.2012 of the Minister of Health approving the Recommendation for organization and Operation of the Advanced Critical Cardiac Care Units - USTACC**

Order no. 1322/21.12.2012 issued by Romanian Ministry of Health approving the Recommendation for the organization and operation of the Departments of Anesthesiology and Intensive Care services in local languages.

Recommendations for the structure, organization and operation of intensive cardiac care units published by the ESC ACC Working Group in 2005.

USTACC documents consist of the main body and four Appendices:

- Pathology that can be admitted in USTACC.
- Structural, architectural and technical characteristics of USTACC.
- Minimal medical equipments required.
- Periodic evaluation of USTACC activity.

# Session commune Société roumaine de cardiologie, Société française de cardiologie, Paris le 17 janvier 2013

J.-J. Monsuez

Service de cardiologie, hôpital René-Muret, Hôpitaux universitaires de Paris Seine-Saint-Denis  
jean-jacques.monsuez@rmb.aphp.f

La session d'interface entre les sociétés roumaine et française de cardiologie, présentée dans le cadre des XXIII<sup>es</sup> Journées européennes de la SFC en janvier 2013 (figure 1), portait sur l'insuffisance cardiaque aiguë. Comme au cours de toutes les sessions communes internationales des JE SFC, la co-modération était confiée au vice-président de la Société roumaine de cardiologie, le **Professeur Ciudin** (figure 2). Les recommandations actuelles ont été présentées par le **Docteur Antoniu Petris** (Iasi, Roumanie) dans la perspective de leur évolution. Entre 2010 et 2025, la prévalence de l'insuffisance cardiaque (IC) passera de 2,8 % à 3,3 % et les dépenses satellites de 9,7 à 15,1 milliards de dollars. Les moyens mis en œuvre pour y faire face doivent s'adapter à cette évolution, en optimisant les stratégies thérapeutiques et éducatives dans le cadre d'une approche multidisciplinaire associant

le médecin, le cardiologue, les paramédicaux et les malades. Le projet thérapeutique mis en place à la sortie de l'hôpital conditionne le pronostic ultérieur, tant en ce qui concerne le contenu et la conformité aux recommandations des prescriptions médicamenteuses (diurétiques, IEC, bêtabloquants, contrôle de fréquence), que les instructions données aux malades, aux rendez-vous de suivi en consultation et/ou par téléphone. Le risque de ré-hospitalisation dépend directement de cette période qui suit la sortie de la phase aiguë et de la qualité de l'organisation de la prise en charge à ce moment.

La télémédecine a été proposée comme une des innovations de cette prise en charge éducative. Les résultats des premières études ont semblé prometteurs, avec une réduction à 6-12 mois de la mortalité totale et des hospitalisations pour insuffisance cardiaque et de leur durée. Néanmoins, deux essais randomisés récents n'ont pas retrouvé le même bénéfice de la télécardiologie, le pronostic ne différant pas entre les malades suivis de façon conventionnelle et ceux suivis en télécardiologie. Ainsi, parmi les 1 653 insuffisants cardiaques quittant l'hôpital au décours d'une première décompensation, l'un des deux essais, Tele-HF, a com-

### Romanian USTACC

Recommendation for the organization and operation of the Advanced Critical Cardiac Care Units

Topics: Acute Coronary Syndromes (ACS)

Date: 01 Feb 2013

On December 20, 2012, Romanian Ministry of Health issued Order no1322/21.12.2012 of the Minister of Health approving the Recommendation for the organization and operation of the Advanced Critical Cardiac Care Units - USTACC.

This official document was created by the Acute Cardiac Care Working Group of the Romanian Society of Cardiology (RO-ACC-WG) in cooperation with the Commission of Cardiology of the Ministry of Health on the grounds of two other documents:

- Order no. 1506/November 24, 2009 issued by Romanian Ministry of Health approving the Recommendation for the organization and operation of the Departments of Anaesthesiology and Intensive Care (article in local language);
- “Recommendations for the structure, organization and operation of intensive cardiac care units” published by the ESC ACC Working Group in 2005.

USTACC documents consist of the main body and four Appendices:

- Pathology that can be admitted in USTACC;
- Structural, architectural and technical characteristics of USTACC;
- Minimal medical equipments required;
- Periodic evaluation of USTACC activity.
