Title	European Restart a Heart Day 2015
Start Date	16/10/2015
End Date	16/10/2015
Description	Last year we celebrated the very first 'European Restart a Heart Day'-to teach members of the public how to help restart the heart of someone who has suffered a cardiac arrest. This initiative, that will take place every year on October 16, aims to improve the very low numbers of people surviving out-of-hospital cardiac arrests. This year we are looking forward to celebrating it again <b>BIGGER</b> than last year! A poster campaign and flyers will be distributed in different languages, and events will be held across multiple European countries with the support of their National Resuscitation organisation.
